PROFESSIONAL SUMMARY

Detail-oriented and self-driven BCA graduate specializing in DevOps, Cloud Infrastructure, and CI/CD automation. Hands-on experience building real-world cloud-native systems using AWS, Docker, GitHub Actions, and Infrastructure as Code (CloudFormation). Proven ability to design scalable, secure, and automated deployment pipelines with production-ready projects.

EDUCATION

Govt. Holkar Science College

Bachelor of Computer Applications (BCA)

Indore, MP

2023 - 2026

CORE SKILLS

Cloud Platforms: AWS (EC2, S3, VPC, IAM, Lambda, RDS, ECS, EKS, CloudWatch), Azure (Basics)

DevOps & Automation: CI/CD Pipelines, GitHub Actions, Docker, Kubernetes, Helm, Grafana, Prometheus, GitLab CI, SonarQube

Infrastructure as Code: Azure, AWS CloudFormation, Terraform, Ansible.

Monitoring & Systems: Linux, Nginx, System Deployment, Server Configuration.

Programming & Scripting: Python Scripting, Bash/Shell Scripting, YAML

Development & Tools: Git, GitHub, VS Code, npm/yarn, Netlify, Vercel, Jenkins

PROJECTS

DevOps Accelerator – End-to-End Cloud-Native System

- Built a complete real-world DevOps pipeline simulation and automated CI/CD workflows with GitHub Actions.
- Integrated containerized deployments using Docker and designed a scalable, modular architecture.
- Implemented complete CI/CD lifecycle: code → build → test → deploy.

CI/CD Pipeline with Multi-Cloud Deployment

- Designed automated pipelines triggered on every Git push for zero-touch delivery.
- Deployed applications seamlessly across Netlify, Vercel, and AWS environments.

Personal Private Cloud Infrastructure

- Built a self-hosted cloud system using Nextcloud and Docker on a Linux server.
- Configured secure file access, synchronization, and Nginx reverse proxy for containerized services.

Infrastructure as Code (CloudFormation)

- Automated provisioning of 3-tier AWS infrastructure (VPC, EC2, security groups) via CloudFormation, cutting manual setup time.
- Enabled repeatable and version-controlled deployments to reduce manual configuration errors.

PERSONAL PROJECTS

SecureExam-Platform (Full-Stack Online Examination System)

[Live Site](#) | [GitHub](#)

Developed a full-stack examination platform featuring automated proctoring through **Face Detection**, **Tab-Monitoring**, and real-time alerts via **WebSockets**.

Thikana Dhabla Ghosi (Heritage & Genealogy Website)

[Live Site](#) | [GitHub](#)

Engineered a responsive, heritage-focused digital archive using **HTML5** and **CSS3**, featuring an interactive genealogy tree and integrated **Google Maps API** for location tracking.

ACHIEVEMENTS

- Developed and deployed 7+ real-world cloud-based projects from scratch.
- Delivered 4+ freelance production websites, including [thikanadhabla.in](#) and [deeparchitect.in](#).
- Designed and managed production hosting infrastructure with optimized performance and uptime.

CERTIFICATIONS

Cloud & DevOps Training

(PW Skills)

Docker & Kubernetes Workshop

(Hands-on)

GitHub Actions CI/CD

(Project-based)
